

CYRIL MORLET

CTO & FULLSTACK ENGINEER

PROFILE

I'm a senior fullstack developer with proven field experience, I write Node.js and GraphQL APIs to provide tech companies with an efficient and outstanding growth. Through a self-taught background, I spent thousands of hours perfecting my skills to help you gain an unfair advantage over your competitors.

I manage projects from POC to production release and handle the whole conception of services including Vue.js applications, containerization, NoSQL or in memory database web servers or CDNs, Kubernetes schedulers with tools like Helmfile and Git automated workflows.

You can find many of my own JavaScript libraries and open source tools on my GitHub profile
